

PPPL Guest Network Connections Information Sheet

- PPPL visitors can connect to the Guest network: **PPPL-Guest**
- After connecting to the PPPL-Guest network, open a web browser to register your device on the PPPL network.
- During the registration process, your system will automatically be checked by a brief scan and **must** meet the following requirements:
 - All Guest computers must have an Anti-Virus software installed with the **latest** virus definitions.
 - Windows users **must have the latest** Windows OS Updates

If you need anti-virus software, the following links offer free, reliable software:

- Windows OS <http://free.avg.com>
- Mac OS X <http://www.clamxav.com>

PPPL also does not allow any type of Peer to Peer or file sharing programs on our network. Please disable these programs before visiting. This includes **Skype**.

If you have Skype installed:

- Do not to use Skype for phone calls while at PPPL
- Disable the automatic Skype startup and login that cause the computer to join the P2P network automatically.

If you have trouble connecting to the PPPL Guest network, contact the Help Desk at x 2275.
